

- **Robust and compact design**
- **Fast response time**
- **Wide environmental temperature range**

The ETP-AM-SP-ASL-PT temperature probe provides a measurement solution where heat, dust and moisture are prevalent and where a compact and robust high-reliability design is required. This sensor is particularly suitable for demanding temperature monitoring

applications on vehicles, especially in the motorsports industry. With its fast response time and wide environmental temperature range, it is equally well-equipped for measurement of liquids and gases used in test machinery and industrial instrumentation.
