

- **Cost effective standard model**
- **Robust and compact design**
- **For harsh environments**
- **Wide environmental temperature range**

The ETP-MO-SP has been specifically designed for demanding temperature measurement tasks as can be found in motor vehicles. The probe is designed to withstand shock and vibration due to a robust overall construction. The selected materials are oil and fuel resistant for use in typical mobile applications whilst supporting a wide environmental temperature range.

Specifications	
Element:	PT1000A other elements on request
Accuracy:	$\pm (0.15 \text{ K} + 0.002 \times t)$
Working temperature:	-40° C to +230° C
Environmental temperature:	-40° C to +150° C
Recommende applied current (self heating must be considered)	1 mA at 100 Ω 0.3 mA at 1000 Ω
Sealing:	IP67
Housing:	316 stainless steel
Cable:	2 core AWC 20 oil/fuel resistant cable with stainless steel braid

Dimensions in mm
